**DETAILED ACTION**

*The finality of previous office action is withdrawn. A new ground of rejection is made herein.*

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nutting et al US Patent No. 3,033,875. The compounds of the Nutting reference clearly overlap with those of applicant's claims, particularly when in applicant's claims,  $x_3$  is thienylene. See cols.1 and 2 of the reference. Selection of preferred substituent groups from those disclosed within the patented disclosure to achieve an optimization of properties would have been obvious to one of ordinary skill in the art at the time of applicant's invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to K. Sanders whose telephone number is (703) 308-2435.
